

2023 UBSI Challenge Project

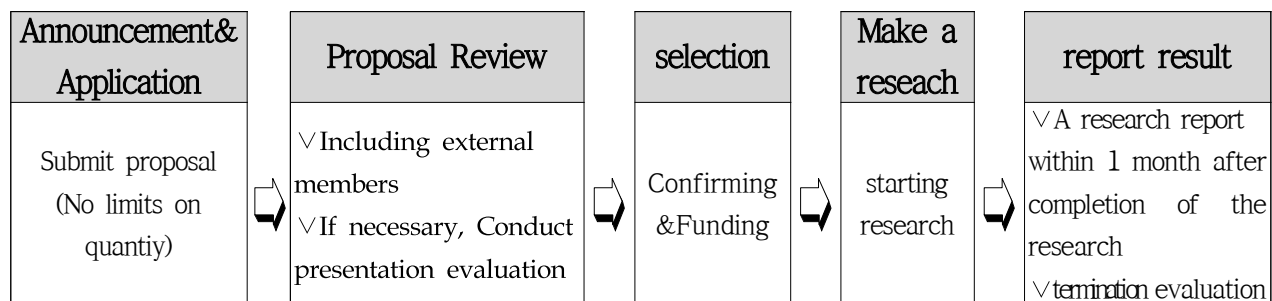

□ Purpose

- Creating a stable research environment for researchers and promoting balanced growth among academic fields through research support in the field of basic science
- Expanding research opportunities and creating a foundation for young researchers with research capabilities through creative and challenging research support

□ Details

- Eligibility: UNIST full time professors Within 4 years of appointment in Department of Physics, Department of Mathematical Sciences, Department of chemistry, Department of life sciences
 - ※ Individual research or group research available
- Subject: free
- Period: starting date of the project~2023.12.31
- Selection: 4 projects T.B.D
 - 1) Theory 30M won per year, 2) Experiment 50M won per year

○ Procedure

o Evaluation Items

Evaluation Items	contents
Compatibility in project	<ul style="list-style-type: none">• Research subject(contents) of Creativity & Conductivity• Excellence of research goal
Contents & method	<ul style="list-style-type: none">• Necessity & Importance Specificity of the plan and method
Researcher' s capability	<ul style="list-style-type: none">• PI's practicability to conduct research project• PI's recent quality in research achievements• Quality excellence of recent research achievement
Use of research results and expected effects	<ul style="list-style-type: none">• Availability to contribute in academic, technical and social• Potential in development of research project

Note

- o Submit a research plan and create a project for final selection researches
- o The amount of support is finalized by the Research Commite after judging the content, importance and suitability of the project
- o The scale or the number of projects can be changed.
- o Determine whether to continue support after conduct termination evaluation
 - ※ Additional support is available for next year depending on the budget and the outcome of each project
- o Thesis and patent achievements are recognized only if they have been acknowledged
- o All regulations, , such as execution standards, project management and evaluation, folow UNIST internal policies

How to apply

- o Application: by March 20th
- o Required Document: 1 set of proposal(attached file)
- o Submission: by e-mail(euns@unist.ac.kr)
- o For any inquiries, please send e-mail
